CWT WORKTOOLS

Higher productivity, easy to use

CWT flat bed applicator will boost productivity in your workshop. Our new generation of work tables are quick to install and easy to use. Get high quality equipment made in Sweden at competitive prices.

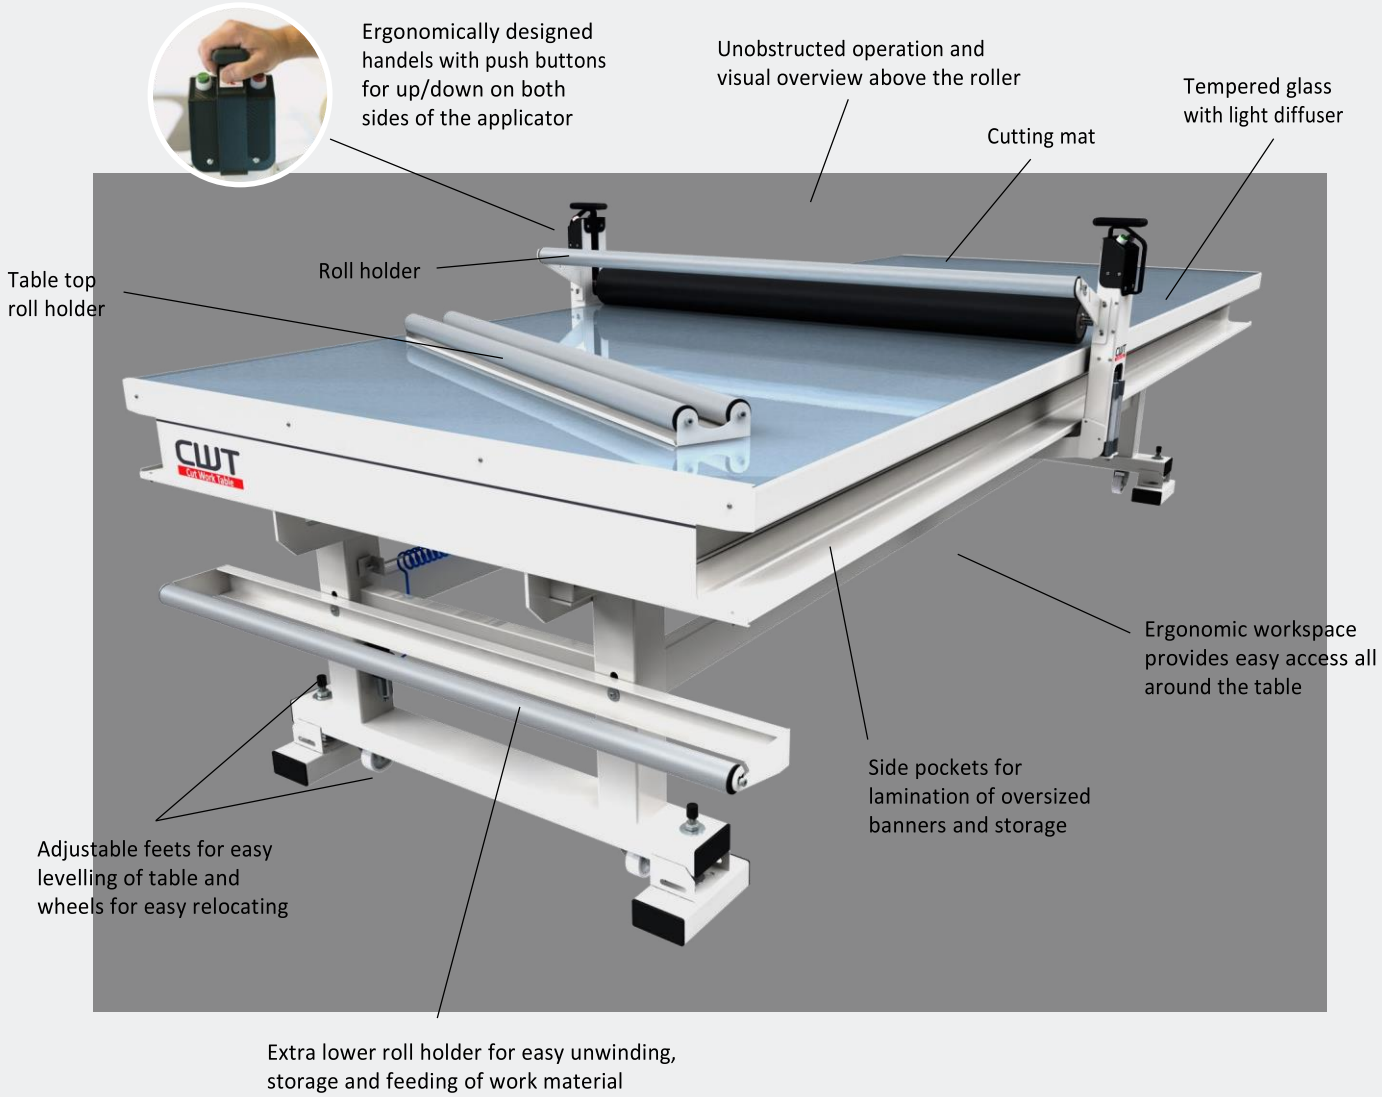
The work table are easy to use so no need for special staff, most people operates the applicator within one hour with fantastic results. Our flat bed applicator gives much better control and less waste than conventional roll laminators due to the easy and precise positioning of the materials and allows a much wider range of materials to be laminated.

Save up to 80–85% production time

Manual laminating work is commonly and skillfully performed around the world. However, a mistake in handling the material or a moment of lost focus when applying the merging pressure could cause the job to be wasted and unwanted costs to be incurred. The time to produce on a manual basis is excessive in comparison with the semi-automated laminating process offered by the new CWT worktable. Estimated reduction of the production time is up to 80–85%!

Better profit and better health

A potential cost saving is maintaining the operators' health and physical status. It is not unusual that intense manual effort over time causes fatigue type injuries. Except for the cost issue a temporary leave of a skilled employee could normally be crucial to the company.



Step-by step application

1

Place the substrate on the table.

2

Place your adhesive material on top of the receiving material.

3

Lower the roller for fixation.

4

Pull the adhesive material halfway over the roller.

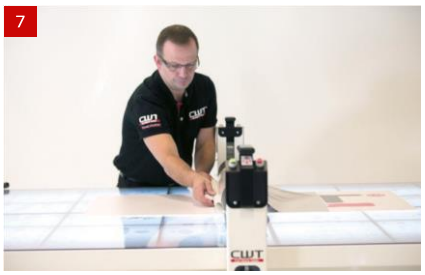
5

Gently remove the liner.

6

Remove any excess liner.

7



Fold the liner under the roller.

8

Now let the table do its job by simply pushing the roller along the table

9

Repeat the same procedure the other way. Done!

Fast assembly, fantastic logistics

The modular design makes the CWT worktable easy to transport and install. The units are delivered in compact packages, less than half in volume compared to other suppliers. The low transportation cost taken aside, the slim package can easily be brought inside customer's facilities through normal sized doors.
