

CompanyCam

What is CompanyCam?

CompanyCam is the easiest-to-use visual communication and documentation tool for contractors and service professionals.

- ✓ Take unlimited job site photos, stored securely in the cloud and not on crew members' phones.
- ✓ Photos are time stamped, GPS tagged, and attributed to the crew member who took it—increasing accountability and transparency between crews, the back office, and the homeowner or client.
- ✓ Photos can be annotated with drawings, arrows, comments, tags, and voice notes and shared easily—streamlining communication when there are questions, unexpected issues, or advice needed.
- ✓ Create custom reports, project galleries, and project timelines within CompanyCam that are easy to build and even easier to share with homeowners, subcontractors, or insurance adjusters.

What makes CompanyCam unique?

CompanyCam creates transparency between crews, the office, and the homeowner—so you can book more jobs.

- ✓ Easy to use, implement, and roll out to your crews
- ✓ Integrates into your current CRM or workflow
- ✓ Photos are stored securely in the cloud, not in your personal camera roll
- ✓ Tons of functionality and consistent improvements being made

How does CompanyCam fit into your process?

Go from sign up to snapping photos in 5 minutes.

- ✓ CompanyCam works with the other software you use to make your workflows effective and efficient.
- ✓ Snap photos in the field that are automatically synced to the cloud and available to the entire team's project feed. Those photos are stored securely and neatly organized by date and job site location for safe keeping. Users can easily share photos, projects, timelines, and before and afters with homeowners, subcontractors, insurance adjusters, and more.
- ✓ We currently have over 30 software integrations with big players in the space, making it easy to plug your current process into CompanyCam and minimize the time it takes to get up and running.
